DELIVERY MODE

11/28/2007

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

**Office Action Summary**

Application No.

10/691,783

Applicant(s)

MAKII, TATSUO

Examiner

Gevell Selby

Art Unit

2622

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 5 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 5 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

### ***Response to Arguments***

2. Applicant's arguments with respect to claim 5 had been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over** Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Nagano, US 2002/0012052.

In regard to claim 5, Nagano, US 2002/0012052, an imaging apparatus comprising an optical unit, wherein said optical unit comprises:

an optical barrel (see figure 16, barrel holding lens group 1a-1c), a fixed barrel (see figure 16, element 3) disposed at a rear side portion on an optical axis of said optical barrel, at least one lens barrel (see figure 16, element 2) being movable along said optical axis with respect to said fixed barrel (see para 83 and 84: cylindrical stationary portion 3 is the fixed barrel and lens holding frame 2 is the movable barrel),

an iris (see figure 16, element 45) for adjusting an amount of light passing on said optical axis (see para. 142);

a solid-state image sensor (see figure 16, element 10) disposed at a backside portion on the optical axis of said lens barrel for receiving light passed by said iris (see para 142); and

an infrared adjuster (see figure 16, element 9) provided on said optical axis and interposed between said iris and said image sensor.

The Nagano reference does not disclose an electro-chromic infrared adjuster having a transmittance to infrared wavelengths electrically controlled to adjust an amount of infrared electromagnetic wave to be transmitted therethrough to said image sensor in this embodiment. However, the Nagano reference discloses several design choices for the light adjustment unit shown in figures 31-35, wherein in one embodiment the adjustment unit or electro-chromic infrared adjustment unit that is formed with a near infrared light cut filter (see figure 32, element 216) and an electro-chromic element (218) (see para. 193).

It would have been an obvious design choice to one of ordinary skill in the art at the time of invention to have been motivated to modify the Nagano reference to have an electro-chromic infrared adjuster provided on said optical axis and interposed between said iris and said image sensor, said electro-chromic infrared adjuster having a transmittance to infrared wavelengths electrically controlled to adjust an amount of infrared electromagnetic wave to be transmitted therethrough to said image sensor, in order to control the transmission light amount through the element to allow the user to easily obtain the desired transmission state. Therefore the Nagano reference discloses all the claimed features of claim 5.

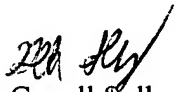

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gevell Selby whose telephone number is 571-272-7369. The examiner can normally be reached on 8:00 A.M. - 5:30 PM (every other Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lin Ye can be reached on 571-272-7372. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
